

## BA-250 Shape Automatic Gas cutting Machine

**BA 250 is a Portable (33 Kg) Shape cutting machine ideal for small workshop doing repetitive jobs on magnetic template tracing.**

### Specifications:

| Cutting Thickness                | Cutting Speed                         | Cutting Precision |
|----------------------------------|---------------------------------------|-------------------|
| 3~100mm                          | 100~1,000mm                           | ± 0.4mm           |
| Diameter of Maximum Cutting Area | Width and length of cutting Rectangle | Weight            |
| 1,500mm                          | 300×900 / 500×750mm                   | 33kg              |
| Power                            | Control System                        | Motor             |
| AC 220V                          | S.C.R. Control                        | DC100V / 25W      |

### **Key features:**

- Nozzle Mix cutting technology from Nissan Tanaka Corporation, Japan ensures no Sustained backfire/flashback
- Recommended for use with TANAKA 3040(Acet) /3051(Propane) or similar KOTECH nozzles
- Unique pressure Valve starts Cutting Oxygen & Motor movement simultaneously
- Motor DC 100V/25W Made in Korea

### **Marketed by:**

**PRECICUT TECHNOLOGIES**
